

Year Six – Gardening Blog

Year 6 children had a fantastic time making delicious quesadillas today. We started with a short lesson about herbs and the important part they can play in our diet.

It provided a great link to our recent Science learning about digestion. Then we headed straight down to the Julia Scurr Garden where we used our eyes and noses (did you know how amazing our plants can smell?) to find the perfect herbs for our mid-morning snack.

Children found parsley, thyme, lemon verbena, mint and rosemary. Once back in the classroom we practised knife skills to finely chop our herbs, before grating cheese, and then adding our ingredients to the quesadillas on the hot plate.

Then it was time for eating – scrumptious!
