

Year 3 Gardening Enterprise lessons

In our Gardening lessons, Simmonds and Wiltshire class have been working hard to plant different herbs, flowers and vegetables in our school garden for the Y3 Enterprise Project.

We are growing: parsley, sunflowers, chives, spinach and carrots and many other examples of garden produce. On **Monday 17th July**, we are expecting to harvest our plants.

We will also create packaging to sell them in a pop up sale after school on that day. Please look out for our stall and be ready to buy some fresh home grown produce to stock your kitchens.
